DISCLAIMER

This document is only used to convey the information. The participants in the buying please carefully read the white paper and the official website of the relevant instructions and comprehensively understand the blockchain and digital assets. Please notice the potential risks and thoroughly assess your risk tolerance and situation to make rational decisions.

The information contained in this Whitepaper is for general understanding purposes only. This Whitepaper is for discussion and presentation purposes only. The proposed blockchain platform "SHIBURN" does not guarantee the accuracy of the conclusions reached in this Whitepaper.

Nothing in this White Paper shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in any way pertain to an offering or a solicitation of an offer to buy any securities in any jurisdiction. This document is not composed and is not subject to any jurisdiction laws or regulations designed to protect investors.

Certain statements in this Whitepaper constitute "forward-looking statements" that are used on the beliefs of the Company and reflect their current expectations. Such statements reflect the Company's views at the time the statements are made concerning future events based on information available at that time, and they are subject to risks and uncertainties that could cause actual results to differ materially from those contemplated in those forward-looking statements. The Company assumes no obligation to update or revise these statements to reflect current information, events, or circumstances, including changes in any risks or uncertainties that may impact them.

INTRODUCTION

Our team is excited to bring you SHIBURN, the new cryptocurrency created by a diverse group of well-skilled individuals from around the globe to become the best of all meme coins. On our expedition to the crown, we will operate with integrity, transparency, and respect for our community. SHIBURN will host a variety of utilities that will recognize individuals' notoriety and status on the blockchain.

The standard for meme coins is to focus solely on aggressive marketing pushes, cult mentality, and of course; hype. They strike when the anvil is hot, and think about the use case later. With SHIBURN we intend to bring you the best of both worlds by implementing solid utility and a strong community. There is no denying that meme coins have far surpassed industry expectations but we recognize and know there is always room for improvement.

SHIBURN seeks to dynamically embrace the most promising sectors of the industry by building holistic gaming, NFT, and play-to-earn ecosystem, backed by a successful team of industry experts. SHIBURN is the world's first blockchain platform that brings together a game with NFT and crypto token with buyback and burns feature and empowering its community - all in one place.

OUR MISSION

STATEMENT

Our mission is to be the best of the meme coins! Unlike many other meme coins that don't stand the test of time, SHIBURN will provide longevity through utility along with competitive, interactive features that will separate us from the rest.

WITH ITS FEATURES AND UTILITIES, SHIBURN IS GOING TO GIVE MORE POWER TO ITS HOLDERS AND SHOW THEM WHAT A BLOCKCHAIN PRODUCT CAN DO.

SHIBURN TOKEN

SHIBURN token is the proper solution through which we can bridge the gap between the real-world and crypto market. It is a ERC-20 network token. SHIBURN utilizes the power of blockchain, NFTs, and the GameFi ecosystem to benefit its holders. Through the blockchain, it makes SHIBURN Token more secure and scalable. The blockchain can expand with its increase in blocks or users. SHIBURN aims to provide more and more utility and use cases through which its users can earn benefits—use cases like Redistribution Reward, P2E game, NFTs, and New Payment System.

By combining the power of blockchain and cryptocurrency, we created a better token than any other token available in the market, with a higher utility to empower its holders. SHIBURN is the first project with an actual utility on top of the community's efforts to hold and grow. You probably already know this, but with \$SHIBURN, you will have higher profits than any other token out there. We made it better.

NFT + UTILITIES

NFT

NFT stands for non-fungible token. Non-fungible refers to unique or special. Opposite to it, fungible things can be easily replaced like currency notes, digital coins, etc. On the other hand, non-fungible tokens are unique and can't be replaced like a short video clip, digital art, etc. NFTs are similar to cryptocurrency units in that they are created and protected using blockchain technology.

SHIBURN empowers its holder with the NFTs. SHIBURN will release an exclusive 1111 NFT collection that will be used on a P2E game. Anyone can purchase those NFTs. NFTs are an emerging part of the global game market: virtual tokens for digital scarcity, security, and authenticity. Each NFT is distinct or unique; it is inseparable and not interchangeable for another.

NFT + UTILITIES

PLAY-TO-EARN GAME

Gaming should be fun. Rather than thinking about every penny you spend and taking up all your time, wouldn't it be great to play to earn?

The Play-to-Earn business model is the latest development in the games industry. It's a business model that embraces the concept of an open economy and provides benefits to all players who add value by contributing to the game world.

Play-to-earn games operate on smart contracts or blockchain programs that execute agreements in code that meet predetermined conditions. SHIBURN is also planning for a play-to-earn game that will give players ownership of digital assets to increase value. Furthermore, gamers can sell these digital assets on public blockchain exchanges.

WHAT ARE BUYBACK AND BURN?

BUY-BACK

If a stock has low value and the potential to perform better in the future, companies often announce a buyback of the stock in the open market. Once companies announce the buyback, investors gain more confidence to purchase and hold. Additionally - the demand increases which ultimately will drive the price up.

At SHIBURN, we choose to apply the Buyback concept to cryptocurrency and make our token more attractive to hold.

BURN

Burning is a deflationary approach to control the supply of a token which works by constantly removing assets from circulation. Burning of SHIBURN will be an automatic process that SHIBURN developers have implemented by adding a function that allows burning the token bought through the buyback process and sends those tokens to the burn address, effectively decreasing the supply.

HOW DO BUYBACK AND BURN WORK?

SHIBURN collects a 10% Buyback and Burn tax on each transaction, which is stored inside the contract. When a Buyback and Burn tax amount reaches our goal of \$50000 this amount will be used to buy the tokens from the market, and those tokens will be immediately burned after purchase. For transparency factors, the buyback burn wallet address will be posted publicly to all the holders to monitor.

THERE ARE 3 ADVANTAGES:

1. RAISE IN VALUE

The supply tokens will be removed forever with each new buyback and burn, increasing the floor price.

2. TRUST

We will buy back and burn the token from the market when the collected tax amount reaches \$50000. This large amount of buyback will increase trust and confidence among the investor and will attract outsiders to invest in the project.

3. INCREASE DEMAND

Buyback increases the demand for the token in the market. Due to scarcity of the token in the market.

OTHER FEATURES

LIQUIDITY LOCK

NEVER, WE REPEAT, NEVER buy into a crypto token that has not locked the liquidity, or intends to lock liquidity ASAP! If you learn nothing else from this whitepaper, please take this lesson for free!

Liquidity is locked by renouncing the ownership of the liquidity pool (LP) tokens for a fixed period (6 months), by sending them to a time-lock smart contract. Without ownership of LP tokens, our developers cannot get liquidity pool funds back.

SMART CONTRACT AUDIT

Smart-contract has been fully audited by interfi which means next to zero risk to our community from potential bad actors. This will provide greater assurance to SHIBURN holders that the contract is valid, and does what we say it does (tokenomics), ensuring there is no hidden or back door functions built-in that may otherwise impact the token holders in the future.

ROADMAP

PHASE 1

- Develop website v1
- Setup social media
- Audit
- Whitepaper v1
- Marketing and exposure
- NFT reveal
- Fair Launch
- First burn & buyback

PHASE 2

- AMA's
- Listing on CMC and CG
- Marketing on all social media platforms
- \$50k spent in buybacks & burns
- Viral publication of burns
- Team expansion
- 1111 NFT minting
- Listing on small CEX's
- Hotbit
- Bit mart
- Probit

PHASE 3

- P2E GAME launch
- 200k in buybacks & burns
- Listing in massive CEX's
- Strategic partnerships
- Bsc bridge
- Website v2
- Certik audit
- 50,000 giveaway to 5 winners

PHASE 4

- Comming Soon
